

The Challenges

- High Print Volume with no management solution in place
- IT Personnel were tasked with device repair
- IT were sourcing devices for 6 departments with no concrete data
- Manual Supplies Ordering
- High inventory carrying costs

The Client

Through steady growth, our client has become one of the largest private surgery centers in the United States by daily outpatient volume. Their team resides in a 60,000-sq. ft. facility with 16 operating rooms, a full-scale materials management warehouse/logistics center, and employs over 100 RNs that support 70 physicians. Seeing hundreds of patients each day for procedures covering Ophthalmic, Orthopedic, Endoscopy, and an array of other surgeries, this team of healthcare professionals demand a fast-paced environment, producing tremendous volume, and requiring maximum uptime.

The Solution

- 2-hr On-Site Response Time
- Standardization of Fleet
- Full Online-Management Platform
- Automated Supplies Logistics
- Removed Inventory carrying costs
- Custom Per-Page Model provided 30% savings
- Full Service Package to free IT's time
